

Upper School Galápagos Islands Trip - Spring Break 2017

March 18-25, 2017

Explore the real-world laboratory that is the Galápagos Islands! D-E students currently in Grades 9-12 will discover what prompted Charles Darwin's ideas on natural selection and evolution, and carefully observe the islands' undisturbed wildlife and habitats.

- Experience unique volcanic landscapes, ranging from extinct to active as one moves from east to west across the islands, in addition to the living examples of evolution and adaptation on every island.
- Students who sign up should have a genuine scientific interest, and consider this trip to be a valuable extension of their studies in biology and geology.

Scientific discovery awaits!

To download the D-E International Trip application form, visit de360.d-e.org. Total trip costs \$4,875. Deposit of \$1,000 is required by November 1st. Cost does *not* include trip cancellation insurance. Questions? Email eganj@d-e.org or de360info@d-e.org.
